

Language Arts Placement Testing Information for *International Students*

Language Arts Test Format & Composition

- Language Arts Computerized **Survey** to provide student with ESL or English test recommendation
- ✓ **ESL Test:** Handwritten Essay (30 minutes, timed) & Computerized CELSA test (1 hour, timed)
- ✓ **English Test:** Handwritten Essay (30 minutes, timed) & Computerized Accuplacer test (untimed)

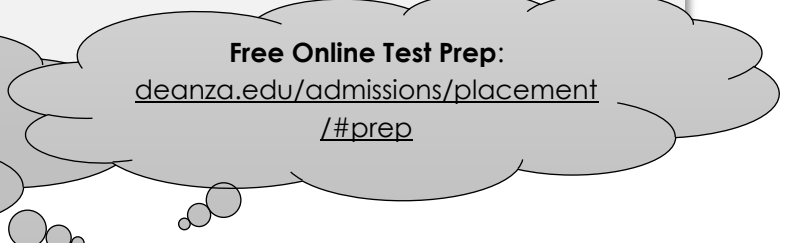

Language Arts assessments are **designed** to help students **succeed** in college by **accurately placing** students into the English or English as a Second Language (ESL) course sequences.

Why ESL Classes Are the Best Option for ESL Learners

- Most ESL learners need to take ESL classes before English classes so that they can be successful in the English classes.
- You need a strong language foundation in order to be successful in college and your career (job). Native speakers already have this foundation. The best way to get this foundation is by taking ESL classes.
- ESL instructors have a Masters Degree in Teaching English to Speakers of Other Language.
- ESL instructors are trained to know what ESL learners need to be successful.
- ESL instructors use methods and materials specifically designed for ESL learners.
- ESL instructors teach grammar for non-native speakers. English instructors teach grammar for native speakers.
- College students know 10,000-15,000 vocabulary words. You need ESL classes to teach you the words native speakers already know.
- Only ESL has listening and speaking classes.
- The English sequence is not necessarily faster than the ESL sequence.
- If you place in classes below ESL 261, 262 and 263, it is because you need to learn the skills taught in those classes.
- ESL 261, 262 and 263 are low advanced classes. Classes below those are intermediate. English doesn't offer intermediate classes.
- If you fail an English class because you do not have the necessary skills, it will take you longer to complete the sequence because you will need to repeat the class.

Math Placement Testing for *International Students*

Math Test Format & Composition

- Computerized tests (untimed).
- Adaptive format; Students *cannot* change submitted answers.
- 4 Math Test Levels offered; Students choose starting level.
- Calculators will pop up on the computer, if allowable.

Upon level completion
and score earned, you
will be...

- ✓ Dropped to a
lower level -OR-
- ✓ Asked to take the
next level up

Strongly Recommended(!):

Students should *preview the sample questions* to determine which math test level is most appropriate. Be ready to tell your proctor at which **level** you would like to **start** your test.

What is the polar coordinate representation of the rectangular coordinate equation given by $x^2 + y^2 = 25$? (**Calculus Readiness Test**)

If $f(x) = 2x + 1$ and $g(x) = \frac{x-1}{2}$ then $f(g(x)) = ?$ (**College Level Math Test**)

If $2x - 3(x + 4) = -5$ then $x = ?$ (**Elementary Algebra Test**)

32 is 40 percent of what number? (**Arithmetic Test**)

The **test scores**
will **determine**
your **course**
eligibility.

Math Test Level	Math Sequence Placement	Recommendations by Major
Calculus Readiness Test	Math 43, 1A	Science, Math, Engineering & Computer Science Majors that require a high level of math courses
College Level Math Test	Math 114, 10, 11, 41, 42, 44, 46	CSU and UC Majors
Elementary Algebra Test	Math 212, 114	Students working toward a De Anza degree or certificate, or for transfer major
Arithmetic Test	Math 210, 212	
IMPORTANT: Always consult your counselor on major/degree requirements
