SUBJECT: Fall 2011Smoking Survey

Please find attached a tabulation of the Fall 2011 Smoking Survey compiled by our student assistant Nergal Issaie. An electronic survey of enrolled students and active employees at Foothill and De Anza Colleges was administered via email and portal message in December 2011. About 2,000 Foothill and about 3,700 De Anza students completed the survey online, resulting in a response rate of about 14 percent. About 600 employees also completed the survey. Almost 30% of respondents are current or former tobacco users.

Responses to the questions:

> Would a 100% smoke-free environment (no smoking on campus or designated smoking areas) improve your learning/working environment?
>
> Do you want the campus to be 100% smoke-free (no smoking on campus or designated smoking areas)?

are consistent between campuses and similar to the fall 2010 survey results, with more than 55% of respondents answering Yes; about 25% opposed; and about 20% indicating no opinion, in this current survey administration.

As depicted in Figure 1 below, 58% of respondents thought that a strict enforcement policy would have a positive effect, with about 2% responding that they might study elsewhere.
