Prerequisite: Prerequisite: Qualifying score on the Math Placement Test within last calendar year; or Mathematics 212 or equivalent with a grade of C or better.

Course Description: Application of exponential and logarithmic functions, rational functions, and sequences and series to problems. Emphasis on the development of models of real world applications and interpretation of their characteristics.

Textbook: Intermediate Algebra For College Students, by Blitzer, $7^{\text {th }}$ edition, bundle with MyMathLab access code. You must purchase the MyMathLab access code from the bookstore or at http://www.coursecompass.com. A scientific calculator is required.

Tutoring Services: The De Anza campus has a tutorial center for math students where students can get "drop in" help. Students can also register to have a regular, assigned tutor for help throughout a quarter. The tutoring center is located in room S-43.

Student Conduct: Do not cheat. If you have a question during a test, you are only allowed to talk to the instructor. Anyone caught cheating on an exam will receive an automatic 0 and be reported to the Dean of the PSME Division. You can be expelled from the class and possibly from De Anza College with a grade of F if you are caught cheating.

Classroom Behavior: Please show courtesy for me and your fellow classmates by turning off and putting away your cell phone during class time, especially during exams. Please do not take calls or text message during class. Do not talk while fellow classmates or I are talking. If you have any type of learning disability, please let me know during the first week of classes so that special arrangements can be made, if necessary.

Time Management: You should expect to spend at least 2 hours outside of the classroom for every 1 hour inside the classroom. This time outside of the classroom may include homework, reviewing notes, studying, and attending office hours. If you want to be successful in this class you will need to put time and effort into it.

Attendance: Students are expected to attend every class meeting. Make sure you sign the attendance roster at each class meeting. If you miss a day, it is solely your responsibility to seek out another student or myself to find out what you missed. You cannot expect to do well in the class if you fail to attend lectures.

Homework: Homework will be assigned every class meeting online and will have a due date. All homework must be submitted by 11:59 PM on the due date. You must set up an account by Friday, January 12, 2018 or you will be dropped from the class. If you have a homework problem you were not able to complete, you have the next class session to ask by putting the problem on the board. $30 \%$ will be deducted from late homework. However, at the end of the quarter your lowest homework score will be dropped. Homework will count for $13 \%$ of your term grade.

Quizzes: There will be a quiz every week. Each quiz will be assigned online or in- class intermittently throughout the term to test your skills on the concepts we are covering in class and online. NO make-up quiz will be given. To compensate for this, I will drop your lowest quiz score. These quizzes will count for $12 \%$ of your grade.

Midterms: I will give three in class exams during the quarter. No notes will be allowed on any exams. These exams will be completed in class and will contain the materials covered in the lectures, online, and in the book. If you are unable to take an exam for any reason, a makeup exam will not be given. In the case of a documented emergency, I will replace a missing exam score with your final exam score. These exams will count for $50 \%$ of your term grade.

Final Examination: If you do not take the final exam, you WILL NOT receive a passing grade. There will be a comprehensive final examination on Thursday, March 29 from 9:15 am - 11:15 am. This test will count for $25 \%$ of your term grade.

Grade Breakdown:

| A+: 97-100\% | B+:87-88\% | C+: 77-78\% | D: 62-66\% |
| :---: | :---: | :---: | :---: |
| A: 92-96\% | B:82-86\% | C: 69-76\% | D-: 60-61\% |
| A-: 89-91\% | B-: 79-81\% | D+: 67-68\% | F: $6 \mathbf{6 0 \%}$ |

## Important Dates:

- The last day to add classes is Saturday, January 20.
- The last day to drop for a full refund no record of grade is Sunday, January 21.
- The last day to request pass/no pass grade is Friday, February 2.
- The last day to drop with a "W" is Friday, March 2.

Tentative Schedule for Math 114, Winter 2018

| Week | Monday | Tuesday | Wednesday | Thursday | Friday |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | January 8 <br> Syllabus | January 9 <br> Section 1.6 | January 10 <br> Section 1.6 | January 11 <br> Section 1.7 | January 12 <br> Section 4.2 |
| $\mathbf{2}$ | January 15 <br> Martin Luther <br> King's Birthday | January 16 <br> Section 4.2 | January 17 <br> Section 4.3 | January 18 <br> Section 4.3 | January 19 <br> Section 5.6* |
| $\mathbf{3}$ | January 22 <br> Section 6.1 | January 23 <br> Section 6.1 | January 24 <br> Section 6.2 | January 25 <br> Section 6.2 | January 26 <br> Section 6.3 |
| $\mathbf{4}$ | January 29 <br> Section 6.3 | January 30 <br> Section 6.4* | January 31 <br> Section 6.6 | February 1 <br> Section 6.6 | February 2 <br> Review |
| $\mathbf{5}$ | February 5 |  |  |  |  |
| Exam 1 | February 6 <br> Section 6.7 | February 7 <br> Section 6.8 | February 8 <br> Section 7.1 | February 9 <br> Section 7.2 |  |
| $\mathbf{6}$ | February 12 <br> Section 7.2 | February 13 <br> Section 7.3 | February 14 <br> Section 7.4 | February 15 <br> Section 7.4 | February 16 <br> Presidents' Day |
| $\mathbf{7}$ | February 19 <br> Presidents' Day | February 20 <br> Section 7.5 | February 21 <br> Section 7.6 | February 22 <br> Section 7.6 | February 23 |
| Review |  |  |  |  |  |

Section 5.6* Review as Needed
Section 6.4* Dividing by monomials only
Section 9.2* Required: composition and finding inverses, Optional: verifying inverses

This syllabus is subject to change at the instructor's discretion.

## Student Learning Outcome(s):

*Evaluate real-world situations and distinguish between and apply exponential, logarithmic, rational, and discrete function models appropriately.
*Analyze, interpret, and communicate results of exponential, logarithmic, rational, and discrete models in a logical manner from four points of view - visual, formula, numerical, and written.
